

Parrini et al. Laypeople's perceptions of frontal smile esthetics: A systematic review 10.1016/j.ajodo.2016.06.022

...Draw a "Smile Frame"  
That is "IDEAL" for THIS patient

Midline and Canting

Is the midline correct? Yes\_No\_ How far off \_\_ \_R/L

Is the smile canted? \_\_Yes\_\_ No

Incisal plane to Commissural line: parallel\_\_\_\_ slanted\_\_\_\_

Incisal curve to lower lip: convex\_ flat\_ reverse\_

Tooth exposure at rest: \_\_mm

Tooth exposure at full smile:\_\_\_\_\_

Gingival margin to upper lip\_\_mm

Incisal curve to lower lip: convex\_ flat\_ reverse\_

Tooth exposure at rest: \_\_mm

Lip line vs. Incisal Edge of Teeth

Incisal edges properly follow lip line? Yes\_No

Size and proportion of teeth

Width of Centrals\_\_ Length of Centrals \_\_\_\_

W/L Ratio\_\_\_\_ (75%-80%)

Are the teeth properly inclined? Yes\_\_ No\_\_

Incisal embrasures Rounded\_\_Open\_\_Closed\_\_

Shade of teeth

Is the patient satisfied with current shade of teeth?

Shade:
